

## **Experiment – 4**

### **Design your own animation using GIMP**

1. Open GIMP.
2. Go to File -> Open as layers.
3. A dialog box opens. Browse to the directory which contains the desired image.  
Select all the images you want to be the part of the animated image.
4. All the selected pictures are added.
5. Check the animation by previewing it as follows:

**Filters -> Animation -> Click Playback.**

6. Click the Play button to start playing the animation.
7. Close the Animation Playback window.
8. Save the file.
9. Export the file as GIF :  
File -> Export -> Check the Animation option and set the delay between the frames.  
Select the location where you want to save the GIF file and finally click export.  
Finish.
